San José, Costa Rica

PROFESSIONAL PROFILE

I am a Computer Systems Engineer with experience in customer service and technical troubleshooting, plus hands-on knowledge of computer hardware, diagnostics, point-of-sale installation, networking and software development. I resolved about 90 customer cases per day under strict SLAs at Capital One, fully in English, and I co-founded a software startup where I built a SaaS financial platform. I am Fortinet NSE 1–3 certified and looking for an entry-level IT role where I can keep growing.

EDUCATION

Universidad Tecnológica Costarricense, Costa Rica **July 2026**
Bachelor's Degree in Computer Systems Engineering
Courses & Certifications

- Fortinet NSE 1, 2 & 3 – Fortinet Certified Associate
- Endpoint Security, Cisco Networking Academy (access provided by INA) – in progress
- Bootcamp Generation

WORK EXPERIENCE

Limes Dev (Startup), San José, Costa Rica **2025 – Present (on hold)**
Co-Founder

- Co-founded a software startup and developed Finity, a multi-tenant SaaS financial platform (Node.js, PostgreSQL, Docker); the product was built but never launched to clients.
- Set up Docker environments and Git/GitHub deployment workflows.
- Implemented RBAC, two-factor authentication, environment hardening and secrets management.

*Capital One (via Foundever), Remote***Jan 2024 – Mar 2025**
Fraud & Credit Specialist

- Resolved about 90 customer cases per day across multiple platforms under strict SLAs, providing customer service 100% in English.
- Multitasked by assisting customers on live calls while chatting with an internal specialist ("Guru") about specific cases.
- Applied structured troubleshooting and escalation to diagnose issues in real time, complying with PCI DSS.
- Escalated high-priority cases via Microsoft Teams and was recognized as a top performer.

PROJECTS

- **Registro Docente 360** (C# .NET, SQL Server, ZeroTier): configured a private VPN for secure remote access to SQL Server without exposing it to the internet; built role-based users and email password recovery.
- **Art Gallery Database** (Oracle PL/SQL, Azure DevOps): served as Scrum Master of an academic team; designed role-based permissions in stored procedures and a trigger-based audit log of user changes.
- **Gmo Training** (React Native, TypeScript, Supabase/PostgreSQL): built an offline-first gym app as an AI-assisted development experiment with Claude, with data privacy enforced through Row Level Security.

SKILLS

- **Customer service & IT support:** troubleshooting, incident triage and escalation, SLA management, ticket documentation, multitasking
- **Hardware & systems:** computer hardware, computer diagnostics, point-of-sale installation, Windows, Windows Server, Active Directory (academic projects), Linux
- **Networking:** TCP/IP, DNS, DHCP, VPN, Fortinet
- **Programming & AI:** Python, Bash, JavaScript/TypeScript, Node.js, C# .NET, SQL, PostgreSQL, SQL Server, Oracle PL/SQL, REST APIs, Git/GitHub, Docker, AI-assisted app development (Claude Code, n8n)
- **Methods:** Scrum, Azure DevOps, Microsoft Teams

LANGUAGES

- Spanish (Native) | English (B2+) | Portuguese (A2)
